

FitLife Mask

the total face experience

Introducing the **FitLife** mask.

FitLife is a total face mask that doesn't contact the areas on and around the nose. FitLife seals around the perimeter of the face, making it a good solution for nasal area sensitive patients, hard-to-fit patients and claustrophobic patients.

For the medical professional...

- With three sizes designed to help fit even the most challenging patient faces, FitLife helps you to find the right fit for your patient.
- Its over-molded cushion integrated to the mask faceplate and its three sizes makes your inventory management easy.
- FitLife helps to establish an effective seal around the patient's face, even under high pressure, making it suitable for a broad range of therapy.

For the patient...

- FitLife was designed to reduce facial marks, potential skin sores and stress on the nose bridge, helping to improve therapy adherence.
- The full vision screen and lightweight body allows maximum visibility and increased comfort.
- The inlaid headgear tabs and snap clips make adjustments easier, for an easy set-up and a quick removal.

The difference is clear to see

FitLife Mask

FitLife premium low-stretch headgear

For improved stability and a consistent fit.

Large surface area

Equalizes pressure and flow inside the mask, minimizing eye irritation.

Large inlaid headgear tabs

For quick, easy adjustment and removal of headgear.

Entrainment valve

Allows access to room air if pressure drops below 3 cm H₂O.

Snap clips

Simplify set-up and eliminate the need to refit after removal.

Increased performance and comfort

- Effortless and effective seal, even under high pressures
- Wide, full-vision screen for maximum visibility
- Optimum pressure distribution, minimizing pressure sores and skin breakdown

Simplicity

- Limited mask parts, due to over-moulded cushion integrated into the faceplate
- Three sizes including small for paediatric use (>7 years, 20 kgs)
- Easy-to-fit premium headgear with integrated inlaid tabs and snap clips

Putting FitLife to the test

In 2011, five sleep labs were asked to trial the FitLife mask*. The trial demonstrated that the majority of patients are likely to continue using FitLife for the duration of their treatment.

* Philips patient evaluation trial, Germany
FitLife vs leading competitor full face masks
